TOWN COUNCIL

The regular meeting of the Town Council was held in the Town hall on Monday last with the Mayor presiding and, with the exception of Coun. Torgan, who was too busy with the bugle of Alders to blow his own horn, a full attendance of Councillors.

Councillor Golden at question time enquired why Mr. Pattin's taxes had been increased 400 per cent over those of last year.

The Secretary explained that the assessment of the property in question was exactly the same as last year, and contended that it was equitable.

A Councillor remarked that Mr. Pattin could not be convinced that it was a square deal to seek him over a hundred dollars for school taxes while he had no children being educated and at the same time allow townspeople to send a dozen or more kids to school without paying a nickel.

The Mayor explained that the difference in the school rate was by reason of subdivision properties reverting to farm lands and being brought under the plow, which he contended was "a damn good thing for the town and country alike."

Coun. Struthers wished to know why the School Board were not providing a college education for the children, and Principal Smith, who was present, informed him that there did not seem to be any demand for it.

The contract between the Town and the United Electric Co. was discussed and Mr. Brown on behalf of the Council, actually advised the councillors that they had not inserted any jokers in the contract that they only wanted a fifty-fifty deal with the town and they would be fully satisfied. This explanation seemed to be satisfactory to the council and the contract was handed over to the committee to settle.

The applications for position of mine manager was read. One from Mr. France, of Fernie, being a most workmanlike document explaining fully just why entrance A could look into entrance B and that entrance C could see both A and B and suspect entrance D and how that entrance C would be the best to use if they bored another entrance (presumably E); also that the entrances were all under water; that the floor of C was not the floor at all, but was on top of the real floor; that the town would have to buy a whole heap of timbers etc. install a pump and pay the miner \$150.00 and engage the whole family in the bargain.

The only other application was from T. Howard who submitted his mining papers and asked for \$130. Coun. Connolly enquired whether Conn. Golden moved the adjournment.

"You-becher-life," says John and it was all over.

BEE!

The fertile imagination of one of our citizens evolved the brilliant idea of holding a rock picking bee on Sunday afternoon at the stretch of gumbo leading to the town coal mine.

The good right arms and solid backbones of other citizens make the scheme practicable and we understand that a good two miles of road was made useable by their exertions.

The originator of the scheme was unfortunately absent, but we understand he is so tickled at the success of the other men's efforts that he is busily engaged upon some fresh ideas for community work which will be carried out on Sundays.

A Word to Property Owners

During the past few months there has been a great demand for modern residences from C.P.R. men and also from farmers who would make their homes in Bassano during the winter months and probably, permanently.

At the present time there are no houses with improvements, such as water, light and sewage installed obtainable, and the consequence is the town is losing many who would be eminently desirable citizens.

Those who have residences on the water line which are vacant would find it a very profitable investment if they installed the improvements which are at hand, and it would certainly enhance the value of their property.

It would also seem in view of the demand for modern residences, that the erection of new houses would be an undertaking from which the elements of speculation have been extricated.

We have been informed upon the best authority that there is every possibility of Bassano being made a divisional point for freight men, and that alone should bring a number of families into town, if the town can properly accommodate them.

In view of the speedy development of the district and the large interests of the C.P.R. we feel confident in urging house owners to improve their properties, and property owners to erect new residences wherever it is possible, for as we stated above the demand is here right now and we are losing citizens every day because we cannot offer them up-to-date propositions in the way of improved houses.

Considerable comment has been caused by the proposed action of the council to handing over to the Electric Light Co. the product of the natural gas well.

The principle is undoubtedly wrong, but under existing conditions we believe the action of the council to be commendable provided they safeguard themselves.

The arrangement with the Company works out to the effect that the town is selling the gas at about 10 cents per 1000 cubic feet, which under the terms of the contract, is a fairly good price.

The one clause which seems to us as a weakness in the contract is that which provides for the Company not being required to furnish power should the daily supply of gas not approximate 40,000 cubic feet.

At the present time the town has no means of measuring the flow and unless a meter is installed at the well the company will be able at any moment to say that there is not a sufficiency of gas and the town cannot argue against it.

We certainly would prefer to see the Council set a price for the gas and install their meter rather than make it possible for jigger-pokery business on the part of the company.

We do not suppose the company will break its part with the town but there always is the possibility of it while such a large loop hole is left for it to wriggle through.

ON OWNING A MAXWELL

OWNERSHIP of a Maxwell car is made easy by the low selling price. Equipment refinements considered the Maxwell is one of the least expensive cars built.

For the well known facts are that Maxwell cars deliver exceptional mileage on a given quantity of gasoline and oil; that, due to their light weight and scientific balance they are travel unusual distances on

one set of tires.

That, by reason of the very best grade of materials and a high standard of workmanship, they require practically no service or upkeep expense.

It is easy to own a Maxwell but what is more important, it is easy to operate it. For these reasons we commend it to your most serious consideration.

BUY AN IRRIGATED FARM

From the Canadian Pacific Railway

DECADE

Irrigation makes the farmer independent of rainfall, and insures good crops, not only occasionally, but EVERY YEAR.

Irrigation makes possible the successful culture of alfalfa, the King of alfalfa, which insures good returns in dairying and mixed farming.

Irrigation makes life the farming and close settlement, with all the advantages of densely populated agricultural community.

Irrigation in the Canadian Pacific Railway Irrigation Block is no longer an experiment, the years that it has been tried having absolutely demonstrated success wherever intelligently applied.

This is the most liberal offer of irrigated land on record.

For full particulars, apply to
Allan Cameron, General Supt. of Lands
Canadian Pacific Railway, Department of Natural Resources
229 First Street East, Calgary, Alberta.

You can buy irrigated land from the Canadian Pacific Railway at prices up to \$50 PER ACRE, with sixty years to pay and the privilege of a loan of \$2,000 for improvements (10% interest) for principal after first payment until end of fourth year, reduced interest if settlement conditions are complied with, and no water rental for first year.

Contract can be paid off before maturity if desired.

CANNED GOODS

Made Free in 'Common Weal' (Lodge)

ELEVEN years ago a few enthusiastic farmers of the West organized a small grain commission company in the hope that they might improve conditions under which grain was sold in Western Canada. They worked under handicaps and against heavy competition, but succeeded. Later other organizations were formed in Canada, each with cooperation the key-note. What they have achieved is well known. Soon there was a demand for closer cooperation among these companies in their business efforts and now—

On September 1st, The Alberta Farmers' Co-Operative Elevator Co., Ltd., and The Grain Growers' Grain Co., Ltd., will no longer be separate organizations as heretofore.

By a practically unanimous vote of their thousands of shareholders, these companies have joined hands so that they can work together in the interests of the farmers of Western Canada. The problems of marketing the products and supplying the needs of farmers are identical throughout Manitoba, Saskatchewan and Alberta. This union of the two old companies with shareholders running well over 30,000, with assets exceeding \$3,000,000.00, with over 300 country elevators, with terminal elevators at Fort William and Port Arthur, with machinery and supply warehouses in Calgary, Regina and Winnipeg, and with an efficient organization under the supervision of a board of farmer directors having full knowledge of the farmers' needs, provides a company that can give maximum service to Western farmers.

The old companies have appreciated your business and they will be glad to serve you in the future under the name of

Let any of our 300 elevators handle your grain or consign it direct to us. Ship your livestock to our stockyard offices in Edmonton, Calgary, or Winnipeg. Order your lumber, fencing, implements, and other supplies from Winnipeg, Regina, or Calgary. We have offices and warehouses in all three cities.

A Flier "Snaps" His Victims **Binder Twine From Flax**

Probably the most marvelous collection of war aviation photographs in the world is an possession of Capeller, who takes a photograph every time he sees an airplane.

Attached to the French fleet, a machine gun is a camera—a repeating camera. The camera is mounted on a gun and the gunner who operates the picture machine.

The novel idea for producing war pictures is the camera mounted on a gun. It has proved such a success in every fighting machine in the world that it is being employed the same way.

Initial Grant of \$300 for Experimental Purposes by Massachusetts Government.

Binder twice can undoubtedly made from the flux grown in inland quantities by the farmers. Some of the flux is being recognized by the local government.

F. H. Auld, deputy minister of agriculture, has taken a very personal interest in the new industry which should prove a great source of revenue to a large number of farmers. He has been very active and greatly through his endeavours has secured a grant of \$300 for experimental purposes. He has made an initial grant of \$300

Military Confidence | Mysterious Ice Mines

Military Confidence | Mysterious Ice Mines

Supreme Object of Instructors at the Great Military Training Schools

A representative of the Associated Press, who was permitted to visit a few of the caves, said that the men of the foreign office, obtained an insight to the remarkable change brought about in the British viewpoint toward the world cannot be over-estimated.

"Use your eye and your brain," is the motto of the cave explorers. The summer ice formations and the low temperature prevails, but as we comes on the interior of the caves, the temperature gradually warms and a kind of subdued mer smell is underground.

The first cave we visited was to be found at Cedarport, Pave one at Descham, Iowa. The sup- per was among the cave. The localities of the caves a wife and one looking with snappiness upon the date enough to invent

[illegible]

manhood in the use of what they are pleased to call the "three B's"—the

heller, the bayonet and the bomb. Experience has shown us that the only way to win is to use the most effective weapons with which to fight. The British have done this. If he has the proper physical and mental training and knows how to use his weapons, the British soldier is certainly the match, if not the superior, of his adversary. The British have established excellent training schools for their young men. They are taught every available method of present-day warfare. They are also highly recommended for promotion are regularly brought back from the front in twenty days, so that they may return to their families and communities in quick order. In this way, the British argue, their men never become demoralized and are always ready for any emergency. The British would

sically, and mentally strong; train them to think for themselves—make

the world will be made safe for democracy."

Cressed Panter Herbert Deane of the Connecticut State Bar has recalled the interesting fact that it was this actor who introduced the word "cress" into the vocabulary of his century ago gentlemen wear their trousers smooth and a ready-made shirt. He also pointed out the middle cresses had been torn out of the pants leg. He bowed out of the stage. He was applauded by the audience. He appeared with a pair of trousers torn at the knees, the edges edged away.

The cressed galliginks were worn by the men of the comic papers ridiculed them by pie-

cing far beyond our ordinary conception. S. R. Henderson, president of the American Society of Authors, said that the cressed galliginks and the roads constitute one of the great drawbacks to international development. He said that the roads of the more prosperous farmers had been mean abandoned farms, sparsely cultivated, and the roads of the poor cities when the poor become poor, the roads mean poor cultivation. He said that the roads mean poor transportation. He said that the roads mean poor maintenance. He said that the roads mean poor maintenance for the necessities of life, loss of soil millions and lake work done, and the roads mean poor maintenance of the soil. Whatever aid the program and farmers give will increase the production of the roads and benefit all the people.

No surgical operation is necessary in removing corns if Holloway's Corn Cure be used.

Minard's Liniment Co., Limited.

Gentlemen.—I was badly kicked by my horse last May, and after using several preparations on my leg nothing would do. My leg was black as jet. I was laid up in bed for a fortnight and could not walk. After using three bottles of your MINARD'S LINIMENT I was perfectly cured, so that I could start on the road.

Time Has Tested It.—Dr. The

made a special reference to his "well-beloved" Dragoon Regiment of thousands. It is in high throughout Canada and its

Bayreuth, of Hofstriegere fame. This regiment had the proud status of being the only one to have fulfilled "the expectations of its Supreme War Lord," and that it has accomplished deeds which will place it high up in the annals of the "Elysian fields." Possibly old Fritz may have been pleased with the feats of this regiment, but we would give a good deal for a copy of the Elysian fields, and a particularly good one of particular account of old Fritz's operations on the course of the war in general.—Westminster Gazette.

"Things ain't fair in this yere ol' place."
"What's the matter, Billy?"
"De Boss wouldn't let me off to go to me grandmudder's funeral, and yere's Tommy been to his grandmudder's funeral four times dis summer."

One Indian Rajah's subjects number about half a million, and he rules over a state as big as England and Wales. He has his own flag and his own army and navy. These are maintained in an efficient state at a revenue of \$1,730,000 a year.

Avoid All Waste

Enormous quantities of food are thrown out daily by stores and restaurants in perishing quantities. Dealers have to allow for this loss by including the value of waste in their margin of profit. It is suggested that welfare organizations in the various cities and towns arrange to have food which may otherwise be wasted collected from the stores each day and distributed where it will be most appreciated or sold at cheap prices for the benefit of one of the war funds.

Excellent Substitute for Lean Meat,
Say the Food Experts

From a bulletin published by the State Agricultural College, New Jersey, U.S.A., entitled "Milk and Eggs as Sources of Vitamins," it appears that the value of eggs in the diet.

Composition of the hen's egg compared with moderately lean beef:

	lean beef	egg
% fat	70.5%	fat, 8% egg, 10.5%
% protein	lean beef, 8.5%	protein, 16.5%
% carbohydrate	lean beef, 20.0%	carbohydrate, 1.0%
% water	lean beef, 1.0%	water, 1.0%

The egg is nearly pure albumen. The yolk of an egg is

of greater nutritive value than the mineral salts. It is rich in calcium, iron, potassium and phosphorus, and contains a large amount of food which is readily absorbed and utilized by the body. The white of an egg is rich in protein.

By comparing the composition of the egg with that of lean meat it will be found that it is a most valuable food and a good substitute for meat. Nine average-sized eggs weigh one pound and contain 100 per cent of the amount of nourishment as one pound of meat.

If eggs are served with such foods as rice, bread, fruit, potatoes and other vegetables, they will be easier to digest and will be less likely to cause heartburn, indigestion and flatulency.

Relief for the Depressed—Calcium and mental depression have their origin in a deficiency of calcium in the system, when these organs are deranged. The calcium deficiency hinders their action the whole system suffers. The remedy is calcium pills. They relieve the digestive organs, act beneficially on the nervous system and restore the vitality of the system. They are cheap, and sure, and the effects are permanent.

The Height of Freshness—Slopper and Freshness—What a difference! What a difference! Wouldn't have been laid out for nothing. The value of a good calendar by millions of the calendar by millions.

at low temperature. Egg albumen begins to coagulate at 134 degrees

At little cost, one can get a small bottle of freezezone at any drug store.

This new drug is an ether compound and dries the moment it is applied and does not inflame or irritate the surrounding tissue. [She thinks] You can life off your corns and calluses now without a bit of pain or soreness. If you're druggist takes treasured you'll find a small bottle for you from his whole sale drug house.

Insane Sophism of the German Mili-

General Maude, in one of his books on military affairs, published long before the war, prophesied the Prussian campaign of frightfulness in the present war. He quoted a German military writer, who said that human suffering was not cumulative; in other words, that no more suffering was caused by killing a thousand men than by killing one. Each suf-

a criminal. This philosophic sophism provided a complete and pseudo-

The German soldiers declared that the death of one man would be justified if so large a ship could be destroyed, and that the suffering of one man was the sum of the suffering of everything that men were drowned. The theory is typically German in mistaking the fact of death for the circumstances of death.

that he be home, bringing me the good news. Generally death is painless. The impact of the death is upon the relatives left behind. One is less sorry for a man who has died before his time than for his widow and his children, for his parents. I am sure that the people of Canada are afflicted as much by the overturning of a canoe and the drowning of a careless lad as by the death or wounding of 95,000 men at

The codfish has the reputation of being the goat of the sea. It will eat anything and there are many records of it having performed some marvelous feats of swallowing.

STILES, The Druggist

Local and Personal.

C. Branning of Dorothy was in town on Saturday.

W. Milton from the Gen. Colner was in town on Tuesday.

C. L. Clarke of Majorville was a Bassano visitor on Saturday.

E. E. Sparks and R. H. Purdy of Jenner were in town over Sunday.

A. C. Long of Majorville paid one of his frequent visits to town on Tuesday.

H. C. Cowger of Hutton was a business visitor to town on Saturday.

L. D. Nesbitt and J. McAdam of Brooks were Bassano visitors on Friday.

Mrs. Marshall and Mrs. Lee of Brooks were visiting friends in town on Saturday.

Walter and Mrs. Morlock returned from their vacation on Saturday night.

A. G. Bond was a visitor to Calgary on Thursday returning Sunday afternoon.

Mayor Truett and Capt. E. Skeritt are attending the Union of Municipalities at Calgary.

L. McKean of Dorothy was in town on Monday hunting up the bargains advertised in the last issue of The Mail.

We beg to acknowledge the receipt of a very interesting budget of news from Pandora, which appears on another page.

The time of Mrs. Foster's Children's Classes which are held on Saturdays have been altered from 2:00 to 3:00 p.m.

E. R. Muir left on Thursday to join his wife at the home of her parents in Moonson, New Brunswick.

Autoists should make an effort to obtain the Alberta Road Guide, which is sold by The General Garage. This Guide is absolutely invaluable to every auto driver.

Don H. Bark, the C.P.R. Irrigation Engineer of Strathmore has been in Bassano this week on business connected with the project at this point.

Mrs. Joe Wright left on Saturday for the home of her parents in the Eastern States, where she has gone to visit her brother. "God speed" in the great adventure.

John B. Shanks of the Gen. Colner came around here on Tuesday and paid up his subscription to The Mail, thereby purchasing a stop-over ticket for heaven. We have lots of tickets left yet.

It is surprising how much business is transacted in the basement of a certain store, and how many more people patronise the back entrance than the front of one of our places of recreation—*Verily, sap.*

It is pretty tough when a man has to procure the written order of a Justice of the Peace before he is allowed to evade the law. It will soon be impossible to stifle here a drink or evade the law at all.

J. S. Mavor paid a flying visit to Gleichen on Tuesday and took the Editor along with him as ballast. We returned to town more firmly convinced than ever that "Bassano is the best etc."

Dr. Neilson, who left for Edmonton on Friday last, expects to return about the end of the month, and requests that his patrons postpone any calls or pains until that time.

Our local John, M. E. LaZerte, conducted a party of ladies to Calgary on Saturday. Nothing more exciting than three punctures, and an ice-cream soda which was obtained at Gleichen, occurred on the way.

In order that pilgrims from the prairie may see our beautiful plantation of lilies surrounding The Mail Office we have pulled the weeds which have hitherto hidden them from view. We are now in a position to advise others to do likewise.

Total \$222.00

Belgian Relief Fund.

The following letter speaks for itself.—On behalf of the Belgian Relief Committee for Southern Alberta, I wish to thank you for your favor of Sept. 14th enclosing check for \$21.00, representing contributions to The Mail fund for the Belgians for the months of July and August. This will be acknowledged in the usual way in the press on Saturday next. The work of the Bassano Mail in this connection is much appreciated by the Committee who trust it will be continued.

Yours very truly,
Della A. Jones
Secy. to Mr. Woods.

Home Dressed Meats

IT'S LOOKS WILL
PLEASE HIM

It's easy carving will please him
still more, and its flavor will
please him to the very highest
degree. That's what our meats
always do to the man of the
house. And the rest of the family
will enjoy it as they feign did
must eating before. Try a roast,
a steak or some chops. Our prices
are no higher even if our meats
are so much better.
